

# Illustrated Name Tag Examples

# **Illustrated Name Directions/Requirements:**

For this Project you will:

- Learn how to communicate visually by illustrating the letters of your name
- Have fun and be creative when designing your illustrated letters and choosing your art materials.
- Complete a reflection sheet.

## **Supplies**

- Pencil
- Eraser
- Drawing paper
- Colored construction paper
- Glue
- Scissors
- "All About Me" handout
- Colored pencils
- Markers
- Positive attitude ☺

## **Directions**

1. Fill out the "All About You" handout. This will be how you will brainstorm for this project.
2. On practice strip of paper practice drawing your letters.
  - a. These should be at least 3 ½ inches tall.
  - b. USING A PENCIL...turn your letters into Illustrated Letters that represent something about you! So for example the letter "A" could be turned into a slice of pizza, or the letter "S" could be turned into a snake. These letters must somehow tell the viewer something about you! You must do each letter of your first name.
3. When you finish your illustrated letters get together with some one else who has finished and see if they can guess what each letter is. Preferably someone you do not know. You may find out that you have some things in common! If your partner can't tell what the letter is, brainstorm ways to fix the problem.
4. Redraw your letters on final paper
5. Outline your letters in black with a sharpie marker.
6. Color your illustrated letters using markers or colored pencils.
7. Design a background on construction paper. You can collage using scrap construction paper, use marker, or colored pencils.
8. Once you have finished your background, cut out your letters and glue them down.
9. Fill out reflection sheet and tape to the back of your artwork.
10. Put your name and hour on the back of your work and turn in to the turn in folder.

## **Project requirements:**

- Illustrated letters that are 3 ½ inches tall that tell the viewer about you
- Completed "All About You" handout
- Decorated background
